

— **Call for Papers** —
A Symposium on
Bio-/Nano-Materials and Self-Organizing Smart Structures

Sponsored by the ASME Manufacturing Engineering Division's
Nano/Micro/Meso Manufacturing and Biomanufacturing Technical Committees
2019 ASME International Manufacturing Science and Engineering Conference (MSEC)*
June 10-14, 2019
Erie, Pennsylvania
Hosted by Pennsylvania State University, The Behrend College

Technical Focus

Recent advances in bottom-up synthesis and self-assembly of nanomaterials as well as biomimetic and bioinspired designs and processes underlie a revolution in advanced manufacturing. Multiscale hierarchically architected structures are ubiquitous in nature enabling the wide variety of impressive mechanical, thermal, optical, and other properties observed among natural materials, such as nacre and silk, or biological surfaces, such as butterfly wings and shark skin. In particular, ordered nanoscale and mesoscale building blocks give rise to unique collective properties that are not only dependent on the properties of the individual building blocks, but also on their spatial arrangement in one, two, or three dimensions. Combining this organization with stimuli-responsive and active materials opens the door for creating smart structures, actuators, sensors, etc. that were previously impossible. Moreover, leveraging the concepts of origami and kirigami have been shown to be promising fabrication strategies for emerging applications in energy and healthcare. This symposium brings together interdisciplinary research efforts from academia, national labs, and industry focused on developing new fabrication strategies for advanced bio-/nano-materials and self-organizing structures. Specific topics include, but are not limited to the following:

- Bottom-up synthesis of nanomaterials (e.g. nanoparticles, nanotubes, and nanowires)
- Chemical vapor deposition of carbon nanotubes, graphene, and other nanocarbon forms
- Post-synthesis processing and functionalization of nanomaterials
- Nanopatterning, lithography, and self-assembly of hierarchical 2D/3D nano-/micro-structures
- Processing of protein-based materials and composites including silk
- Folding and assembly of biological oligomers and polymers (DNA, RNA, polysaccharide, etc.) including cellulose
- Design and fabrication of biomimetic and bio-inspired materials
- Engineering materials for flexible substrates, transparent films, and transient electronics
- Origami- and kirigami-based fabrication of multifunctional structures
- 3D fabrication of complex structures by engineered folding of 2D sheets
- Design and fabrication of stimuli responsive materials for multifunctional devices
- Mechanics, acoustics and optics of metamaterials and cellular structures

Paper Submission

Authors are encouraged to submit an abstract and full manuscript for review by **November 02, 2018** via the conference website. Final revised manuscripts must be submitted by **March 15, 2019**. The copyright transfer form must be filled out by March 8, 2019, and the presenting author must pre-register by **April 05, 2019**; or the paper will be withdrawn from the conference. Authors may also consult www.asme.org/divisions/med/call/ for updates. **No papers are to be submitted to the organizers; submissions will only be accepted via the conference website at www.asmeconferences.org/msec2019/.**

Additional Symposium Activities

To highlight advancements in this technical area, symposium organizers will:

- work to attract a high profile international keynote speaker
- organize a special issue in the ASME Journal of Manufacturing Science and Engineering or ASME Journal of Micro and Nano-Manufacturing, with a state-of-the-art paper that will be the lead article in the special issue

Organizers:

Dr. Mostafa Bedewy, University of Pittsburgh, Pittsburgh, PA, USA. 412-624-2682; mbedewy@pitt.edu
Dr. Sameh Tawfick, University of Illinois, Urbana-Champaign, IL, USA. 217-244-6303; tawfick@illinois.edu
Dr. Amir Tavakkoli, Canon Nanotechnologies, Austin, TX, USA. 512-339-7760; atavakkoli@cnt.canon.com

* The conference is collocated with NAMRI/SME's 47th North American Manufacturing Research Conference (NAMRC47), which will have a separate call-for-papers. Please note that multiple submissions of the same paper to more than one conference are not permitted.
